**Subject:** FW: R 10 school PCB issue (Sky Valley)

Hi, Mario—Is there any reason you can't get to this data review today or Monday and get back to Peter and Kendall?

Thanks,

Joe

**Subject:** R 10 school PCB issue (Sky Valley)

Jose, CMB and Peter have been asked to “help out” Region 10 Ex. 5 - Deliberative Process  
**Ex. 5 - Deliberative Process** on a PCBs in caulk and ballast resistors in the Sky Valley School of the Monroe ( a suburb of Seattle) School District. Kendall went and inspected the school several weeks ago and we recently received some data that has to be analyzed. Region 5 has the lead for this case.

Peter and Kendall brought the data to Mario and asked him to opine on risk and next steps. We need this information right away, we can't sit on this. There is one data point that may be above health benchmarks. I want to bring this to your attention, so that you know about this. If for any reason that Mario can't act quickly, please let me know and I will ask ATSDR to get involved. If we need to talk, I am working at home and my e-500 is on. I will be leaving my home from 11:35 to 1:20, but working until at least 5 pm when I return. If not, have a good weekend!
